

Leak Proof Guarantee

Fully sealed roof after installation, we supply 10 replacement roof tiles, with 5 years leak free guarantee (excludes Terracotta roof tops).

If it leaks we make it right without charge, (upon confirming it originated from our installation practices under the solar panels).

Gutter Vacuum

We clear your gutters after installation with an industrial gutter vacuum, so any pieces of grinded off tiles and debris generated from the installation are collected, keeping your gutter free from blockages.

5 Years Workmanship Warranty

We have a workmanship warranty of 5 years, if a fault has occurred within this time due to our installation practices we rectify the issue with no costs to you.

Product & Labour 5 Years included

If a product breaks or fails within 5 years of installation, we simply replace it, no out of pocket expenses for replacement parts or installation labour.

After Hours Support

We have an AI after hours agent that will guide you through an urgent situation where you might be left without power from a failure of the system.

5 years Maintenance

We visit your installation every 2 years to maintain the system, make any fixes and reconnect to wifi if needed. This includes a full wash of the panels and a battery health check.

Highly Qualified Staff

With an in house technical advisor with 24+ years experience, we train and maintain a very capable and competent staff with all the CEC, SAA Certifications, including Battery and solar training, along with ongoing support and training with Master Electricians association.

Thunder Storm Protection

lightening storms and over voltage power fluctuations can destroy your new power equipment in a flash. We install a surge arrestor in each of our installations so you have peace of mind it will be protected as best we can.

Qualified Designers

We leverage our solar design training and years of experience installing solar and battery systems to give you the best advantage possible for year round solar production and storage. Carefully designing for the winter months to optimise your solar output is our key priority

Competitive Pricing

We have refined our process and introduced mechanical equipment to help to be more productive and safe in the workplace. This includes an all electric policy for company vehicles, meaning we can spend our valuable time and money on
