

Manufacturer's Statement

July 28th, 2025

The Hinen inverter products (Models: A8000S, A8000S-E, A10000S, A10000S-E) have a rated output current of 34.8A (for A8000S/A8000S-E) and 43.5A (for A10000S/A10000S-E), respectively. The maximum input current for all the models is 72A. However, the internal control system is configured to limit the operating current to 63A to ensure safe and reliable operation under typical conditions. This design is in compliance with local laws and regulations to ensure the stability and safety of the device.
